Group 1 iOS

Time	Issue
~3:00	Looked at a bunch of events instead of using the "Sort" button.
~4:25	tried to search for an event Friday night, but searched for events at 11:45 am Friday and so no events came up. Then hit directions, and that didn't work, then tried to use Nearby to find events Friday night. Eventually found the sort button, which worked well enough (though the idea was to use search).
~9:35	tried to search events to find friends, before finding the friends tab around 9:50.
~11:38	search end time wasn't showing up on search screen. Setting and end time later wasn't getting search results either. Eventually I had them just move on.

Group 1 Web

Time	Issue
~2:50	changing the location on the homepage changed the map and slideshow, so they didn't even move pages; just did everything from the main page. Which...works!
~4:55	started typing Rendezvous, and the autocomplete was there, but the users didn't click or select the suggestion, so the place never got "set" in the app. Users wound up just setting event location to Flagstaff, AZ.

	Time
iOS	14m 38s
Web	5m 45s
Total Time	20m 23s

Note:
Neither user owned a
smartphone

Group 2 iOS

Time	Issue
~1:15	fields were a little small; users has trouble selected a field and having the keyboard come up.
~3:00	"soonest" event actually had already happened. Users had to go to second-soonest event.
~4:10	users attempted to check-in from the event details page, before finding the check-in tab at 4:25
~8:25	date-advance buttons only work once

	Time
iOS	10m 25s
Web	5m 20s
Total Time	**15m 45s**

Group 2 Web

Time	Issue
~	Forgot to refresh app, so it was still in NY from the last test. Tester error!

Note:

Group 3 iOS

	Time	Issue
	~6:19	counting days for search (got it wrong)
	~8:40	confused about "getting current location" message
	~9:10	presses several times trying to get the start date to highlight

Group 3 Web

	Time	Issue
	~1:28	typed "new york" into search field rather than switching to new york using the city picker
	~2:34	dropped pins changing colors confused the driver
	~4:20	date picker wouldn't allow them to select a date
	~5:20	image file on desktop would not show up???
	~6:02	dragged image from desktop instead

	Time
iOS	10m 14s
Web	6m 27s
Total Time	16m 41s

Note: (Female, Female)
One iPhone owner. One
iPod touch owner.

Group 4 iOS

	Time	Issue
	~1:21	find how to sort by soonest
	~4:20	didn't see check in at top right of event. instead went to the check in tab and re-found event
	~4:35	checked in on accident without writing comments. Went back and redid
	~6:30	counting days from the current date to figure out when friday is
	~8:30	can't change the end date when creating events. Finally accidentally changed date with +1 week

Group 4 Web

	Time	Issue
	~3:35	can't find the picture because it wasn't on the desktop

	Time
iOS	10m 5s
Web	5m 30s
Total Time	15m 35s

Note: (Male, Male)
One has an iPhone 3G and the other a old ish android device

Group 5 iOS

Time	Issue
~2:06	Can't find the event happening soonest. Goes through all the events manually searching. Finally finds the button when they realized there must be an easier way.
~4:00	confused about the closest event because they are at NAU but it says monti vista is closer.
~4:18	Trying to check in, miss button on event detail page. Search through checkin page manually for awhile
~5:52	try to find friends in the search tab instead of the friend tab
~8:00	search button was disabled, found the other one in the top right corner
~8:20	discuss if they have confirmed attending event because the check mark isn't enough feedback? Want to post a status or leave a message or have a bigger confirmation.
~9:10	Freeze the app by clicking check in.
	Tripping out about the location because it's disabled

	Time
iOS	12m 6s
Web	5m 45s
Total Time	**17m 51s**

Note: (Female, Female)
One just purchased an android phone and the other has had one for awhile.

Group 5 Web

Time	Issue
~2:25	Have trouble finding events in new york. Wrong spelling and too broad a search.
